DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

1. **Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.**

Regarding claim 4, this claim recites the limitation "and/or", It is unclear if applicant is referring to "and" or "or".

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. **Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Sloane (U.S. Patent No. 5,918,211).** Sloane teaches a wireless incentive-providing barcode scanner that recites all of the limitations of the above claims.

Regarding claims 1, 2, 4, 9, and 10, Sloane teaches a wireless device with a UPC bar code scanner used by the shopper to scan product bar codes in a store (Abstract). The device uses the bar codes scanned, along with consumer purchase

history (shopper information) to determine an incentive for the user (Abstract). The incentive offered to the user could be a promotion for the product scanned or a promotion for other competitive products (this is an example of competitive incentive offer engines) (Column 3, Lines 16-28). The user is able to select which promotional offers to be redeemed (Column 3, Lines 16-28). The wireless device can communicate the redeemed incentives to a point of sale (Column 3, Lines 48-59).

Regarding claims 3, 5, 7, 11-13, 15, and 16, Sloane teaches communication over radio frequency and cellular communications (Column 7, Lines 49-57).

Regarding claim 8, the circuitry contained within the device of Sloane is the same type of circuitry that could be found in a GPS, and therefore, Sloane's wireless device comprises GPS circuitry.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. **Claims 6 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sloane (U.S. Patent No. 5,918,211) in view of Anttila (U.S. Patent No. 6,862,575).**

Regarding claims 6 and 14, Sloane does not teach the wireless device as generating a bar code to be scanned by a point of sale. Anttila teaches a wireless

device that generates a scannable bar code (Column 5, Lines 6-10). It would have been obvious to one having ordinary skill in the art at the time the invention was made to allow Sloane's device to generate bar codes to promote ease of use.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
